

How to **STOP YOUR CAR** if it **unexpectedly speeds up**.

If your car speeds up on its own, and you can't stop it by pressing on the brakes, follow these steps **IMMEDIATELY!!!**

Steps	What to do	
1	Step <i>hard</i> on brake pedal with your foot. <input type="checkbox"/> Do NOT pump the brakes – makes it harder to stop your car.	
2	Shift to N (neutral). <i>If you can shift to N:</i> <input type="checkbox"/> After slowing down, steer car to a safe place by the road.	
	<i>If you cannot shift to N</i> <input type="checkbox"/> Keep pressing the brake to slow down the car.	
3	Turn off engine. <i>Cars with a key:</i> <input type="checkbox"/> Turn engine switch to ACC position -- the position when you want to listen to the radio, but the engine is off.	
	<i>Cars with a smart key:</i> <input type="checkbox"/> Press the "START ENGINE SWITCH" 1. for 3 seconds or more, or 2. quickly 3 times or more.	
4	Move your car to a safe place by the road.
